

The transition to secondary school

Dear parent(s)/guardian(s),

Your son or daughter is in group 8 and will soon receive their final school advice. You are likely already actively exploring different schools together. It's an exciting period with a lot coming your way! Through this brochure, we aim to provide information and support during this process.

This year, for the first time, the enrollment for secondary school will take place digitally. This will be done through De-Overstap, which is the digital enrollment system. In this system, you will indicate your preferred school choices. The following page outlines the steps for digital enrollment.

If you need assistance with filling out the digital enrollment, please contact the year 7 teacher. The primary school will assist you in this process.

Kind regards,
De-Overstap

How does online enrollment work?

step 1 log in and account

In February/March 2024, you will receive an email from noreply@de-overstap.nl containing your personal login credentials for the parent portal of the digital enrollment system. After logging in, you will see the details of your child and the contact information.

step 2 Check

It is advisable to carefully check whether all contact details are correct.

step 3 Overview schools

It can be helpful to have a clear overview of which schools are suitable for your child's advice. You can consult the 'filling aid' for this purpose. This 'filling aid' is a PDF file with a school overview that matches your child's advice.

step 4 Digital enrollment form

Next, you can fill in the application form. You indicate in order of preference the schools your child would like to attend. You also have the option on this page to indicate whether you qualify to use the priority rule at the school of your preference (which is the school listed as choice one). If you are not sure whether you qualify for this priority rule, you can find this information in the 'filling aid' as well." (Students from OIS are given priority at Haarlemmermeer Lyceum Bilingual)

step 5 Check and confirm

When you have filled in all the information, it is advisable to double-check everything. Once you click the confirmation button, it will no longer be possible to modify the data.
